

E-TRANSIT

 handimobil  auto products

The new Ford E-Transit is the same Ford Transit you know, but with all the benefits of a fully-electric vehicle. The E-Transit mini bus from Handimobil / Autoproducts enables you to bring passengers in and out of Low Emission Zones and comply with national regulations at the same time.

Seamless Daily Operations

The Ford E-Transit redefines eco-friendly mobility with a focus on accessibility and efficiency. Its lightweight construction and advanced features, including an energy-efficient drivetrain and innovative materials, improve performance and extend range. Ideal for urban

transportation, it navigates city streets and Low Emission Zones with ease. Designed to accommodate up to five passengers and two wheelchair users, the E-Transit ensures a seamless, sustainable, and practical transport solution.

With our carefully selected range of both durable and lightweight products, the E-Transit wheelchair-accessible mini bus is designed to maximize efficiency and optimize mileage. This means more time spent on the road serving customers and less time at charging stations.

Key features include the advanced SKY composite floor with seven integrated aluminum rails and a weight-optimized aluminum platform lift. Every detail is engineered to perfectly balance weight reduction, functionality, and usability, ensuring seamless operation.

E-TRANSIT

Equipment

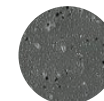

S=Standard O=Option
